FYI.

The state is trying to commingle lorraine and wilcox sites. We have already done extensive work at both sites and this includes OPA assessment. But no removal recommendation. There may be a pending law suit against the developer of the wilcox site. I recommended to Todd of ODEQ that the state may access the Browns fund to conduct TBA at this site because of petroleum if this is possible.

Just some thought.

Ok. Philip, can you send Lydia the requested information on Lorraine?
thanks

John,
Yes, someone will be assigned shortly and will attend the meeting. Can

9566136

you send me some info on the location and type of site it is. Thanks.

Lydia,
ODEQ wants to move forward on this site for possible NPL listing. They have done some enforcement work, but know that more needs to be done. We are going to meet with them on April 8th to discuss status. Could an enforcement person attend?

John,
We looked into a video conference and found out that our Agency's video conference equipment is broken and IT does not know when it will be fixed. I am sorry about that! Could we meet in Ardmore again to talk about the ESI sampling? Or would you rather that Todd, Hal and I drive to Dallas to meet with you guys? We can do either. Todd would like to get something set up for the 1st week of April if possible. April 6th – 8th are open for us.

Thanks!

Amy
